Proposed Solution Template

Date	12 oct 2022
Team ID	PNT2022TMID47584
Project Name	Skills and job recommendation
Maximum Marks	2

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	**A problem statement is a concise description of an issue to be addressed or a condition to be improved upon. It identifies the gap between the current state and desired state of a process or product. Focusing on the facts, the problem statement should be designed to address.**
2.	Idea / Solution description	**Most of the job seekers does not have entry qualification so we make a online practical exam to check the quality of knowledge if he/she pass the online exam then they move to online interview after that then move on to live interview and get their dream job**
3.	Novelty / Uniqueness	**Not all application have to be of the tradition resume and cover letter variety. Especially if you are in a visual field, like photography or design. Whip up the best possible presentation of your career accomplishments and put it**

		online.
		You can set up a personal website or digital portfolio to refer employers to and be sure to post your work on social media sites to show what you are truly capable of achieving
4.	Social Impact / Customer Satisfaction	We also have created this meta-list of job resources in the social change/social impact sectors to help you explore the range of career opportunities out there. It is important to emphasize that no one site covers all the jobs in space . Our recommendation is you in visit all the sites on this list and find the ones most relevant to you.
5.	Business Model (Revenue Model)	Today even online job portals have become a crucial part for both job seekers as well as recruiters. The hiring process Has become easy for companies and there are abundant opportunities available for the condidates.
6.	Scalability of the Solution	1.Establish targeted goals 2.Buils an attractive employer brand 3. Build a pipeline of talent 4.Generate accurate job descriptions 5.Streamline your recruitments process via software
